American wholesaler of fragrances and oils Hayward Enterprises has been in business for 10 years serving customers worldwide. Customer satisfaction is our number one priority, and every customer is very important to us. A happy customer recommends our company to friends, family, co-workers and spreads the word about us online. Without this type of word-of-mouth advertising, a company cannot be successful. We pride ourselves in offering only the finest quality products. We stand behind all of our products with a 100% satisfaction guarantee that offers a full refund if not completely satisfied with your purchase. This satisfaction guarantee gives new customers piece of mind that they will be receiving a quality product when they order from us. Our body oils are highly concentrated and are excellent comparisons to the fragrances they represent. One drop will last all day long, so you only need to apply just a dab at a time. Wearing a pure oil on your skin rather than a spray, allows you to experience the true fragrance the way it was meant to be. All of our oils are manufactured by highly skilled chemists that take their time in making sure that each fragrance contains ALL the ingredients it requires. Many customers are simply amazed with the outstanding quality of the oils they receive from us. Each bottle of oil contains 100% pure concentrated oil (no alcohol or water). Most people that are allergic to perfume are not allergic to our oils because they do not contain alcohol. It is usually the alcohol in spray fragrances that people are allergic to. Our company has no affiliation, whatsoever, with any name brand fragrances mentioned on our website. We only mention the name brands on our site for comparison purposes only as stated in the disclaimer message on all of our web pages. Please, DO NOT compare our oils to cheap quality body oils. Perfume and Cologne oils do vary tremendously in quality. Some fragrances actually contain over 200 different ingredients. The oil has to contain ALL the ingredients needed and the same exact notes as the original fragrance for it to have the same. It is also

necessary to have experienced, highly skilled chemists manufacturing the oils. For a body oil to be strong and concentrated, it has to contain a high percentage of Concentrated Fragrance compound. Our oils are so strong and concentrated, that a 1.25 oz. bottle of our concentrated body oil will last 3 times longer than a large bottle of the actual designer perfume.
